

Essential iPhone Apps for Business

With these essential iPhone apps, you can do everything from collaborating with colleagues and customers, editing documents, and sharing files to managing servers and tracking key business metrics. iPhone makes it easy to get work done anywhere. Visit the [iPhone in Business apps page](#) to learn more.

The App Store is on every iPhone. Many apps are free, and others start at just 99¢.

Cisco Mobile 8.0

Place and receive calls over a wireless LAN at work or using VPN anywhere via Wi-Fi.

Cisco WebEx Meeting Center

Tap into WebEx meetings, view shared content, and collaborate with attendees.

Documents To Go - Office Suite

Edit and create Word and Excel documents; view PDF, PowerPoint, and iWork files.

Dragon Dictation

Dictate audio and use voice-to-text translation to create notes or email.

Evernote

Record meeting details with notes, audio, or photos; sync to the web or your desktop.

GoodReader for iPhone

View, annotate, highlight, and manage files with this robust mobile PDF reader.

iDialog

Find contacts, initiate calls, and send messages using Microsoft OCS 2007.

OmniFocus

Create and track tasks by project, place, person, or date; then sync wirelessly.

Oracle iReceipts

Track and submit expenses and integrate seamlessly with PeopleSoft Expenses.

Quickoffice Mobile Suite

Create and edit Microsoft Word and Excel files; view and share PowerPoint slides.

Roambi - Visualizer

Transform your business data into secure, interactive mobile dashboards.

RSA SecureID Software Token

Protect sensitive networked data with two-factor RSA SecurID authentication.

Salesforce Mobile

Instantly access and update critical Salesforce data from the field.

SAP BusinessObjects Explorer

Use simple keyword search and navigation to access volumes of corporate data.

SharePlus Office Mobile Client

Manage your assets and access your SharePoint data easily—online or offline.

Wyse PocketCloud

Remotely access business applications and files on your work desktop.

+ This app is designed for both iPhone and iPad.
