

## Flexibility to plan for the future.

\$1 Purchase Option financing leads to ownership.

We understand the importance of planning for how you'll use and upgrade technology. Financing can be a great tool to help you manage your technology life-cycle goals. The \$1 Purchase Option is ideal for colleges and universities that want to finance and either own their equipment or transfer ownership at the end of the term. It also allows you to maintain your annual budgets, while acquiring several years' worth of equipment at once.

The \$1 Purchase Option works especially well with Apple's Trade-In Program for Education. It facilitates technology upgrades, controls equipment storage costs, and helps recover residual value from products you're not using.\*

Apple Financial Services offers flexible payment options that let you take advantage of the latest technology at its peak, while also setting a clear timeline for upgrades, value recovery, and responsible disposal.

Find out how financing can streamline the way you manage your technology plans and your budget. Contact your Apple representative for more information on this and other financing options.
